SUMMARY

Results-driven Software Engineer with 3+ years of experience delivering high-impact mobile applications (iOS, Android, Flutter) and enterprise AI automation. Proven expertise in building production-grade Azure OpenAI solutions with RAG, AI OCR pipelines and Chat-with-File capabilities, alongside Microsoft Graph API workflow automation. Strong track record of reducing operational overhead by 60–80% while shipping scalable, user-centric products in Hong Kong's telecom and technology sector.

TECHNICAL SKILLS

Programming Languages: Swift, Python, Dart, Java, Objective-C, SQL (MySQL / PostgreSQL), Node.js, PHP

Mobile & Frameworks: iOS SDK, Flutter, Android SDK, React, VB.NET

AI & Cloud: Azure OpenAI (Tool Calling, RAG, Chat-with-File), AI OCR / Document Intelligence, Microsoft Graph API, Firebase, Azure AI Search

Tools & Others: Selenium, Git, GitHub Actions, Workflow Automation, Unity, Blender, Arduino

PROFESSIONAL EXPERIENCE

HKT Services Limited | Hong Kong

Assistant Engineer (Jan 2026 – Present) · **Technical Officer** (Aug 2023 – Dec 2025)

- **Architected enterprise AI solutions with Azure OpenAI** featuring RAG-powered Chat-with-File and tool-calling, enabling staff to extract key information from documents instantly (no manual line-by-line reading) and accelerating internal data retrieval by **70%**.
- **Built AI OCR automation pipeline** to handle multi-format, multi-vendor electricity bills (highly variable layouts across companies), achieving **>95% accuracy** and reducing manual data-entry time by **80%**.
- **Spearheaded optimization of “RF Fighter”**, a mission-critical internal Swift application, improving system stability and cutting crash rates by **45%**.
- **Automated high-volume SharePoint & data workflows** via Microsoft Graph API, eliminating **18 hours** of manual administrative work per week.
- **Engineered Python-Selenium automation suite** that replaced repetitive web-based manual entries, delivering a **60%** increase in operational efficiency.
- **Developed real-time data visualization modules** (line/bar charts) for department-wide performance monitoring and analytical insights.
- **Built Python command-translation bridge** synchronizing HUAWEI UDM commands with ZTE formats for the i5GC project, ensuring **100% accuracy** in cross-vendor data processing.

Awwws World Limited | Hong Kong

Mobile App Programmer (May 2022 – Aug 2022)

- **Led full migration of flagship “Awwws” app** from native codebases to a unified **Flutter/Dart** solution, reducing maintenance overhead by **55%**.
- **Executed comprehensive UI/UX redesign** that modernized the visual interface and lifted user engagement metrics by **25%**.
- **Optimized performance** using advanced Dart packages (Provider, Dio) for efficient state management and network handling.

Wetaxi Technology Company Limited | Hong Kong

Mobile App Programmer (May 2021 – Nov 2021)

- **Refactored “WESPEED” app** from legacy Objective-C to modern **Swift**, boosting responsiveness and execution speed by **35%**.
- **Integrated geolocation & push notification features** (Google Maps API, JPush) for real-time parking monitoring and user alerts.
- **Designed custom AVAudioSession management class** that resolved critical audio queuing conflicts, delivering zero interruption reports for navigation and media playback.

Hi Ten Technology Group Limited | Hong Kong
Programmer (Internship) (Aug 2020 – Nov 2020)

- **Implemented real-time live streaming module** using AWS Live Streaming within an Android (Java) environment, enabling interactive merchant-to-user engagement.
- **Developed gamified MySQL-integrated video interface** supporting real-time user interaction and multiple-choice engagement tools.
